Be advised that from on or about August 1st through October 3rd 2006 any Pacific Engine Room light fixture shipped in a 24 volt configuration may have mislabeled ballasts. The ballasts are labeled 24 vdc but in fact are 12 vdc. The manufacturer of the ballasts was notified of this and we now have replacement ballasts in stock. The lot numbers indicated on the mislabeled ballasts are 01203 and 041906

Should a failure occur please notify Daniel R. Smith and Associates at 800- 844- 8593 or 561-842-5704, attention sales department and we will either send replacement ballasts or light fixtures.

Dan Smith

Best regards,

Bradley Sanguinetti
